

Updates From the Mayor

January 2026

- Sweetheart Stroll February 7: Participating businesses and pop-up vendors in the Village will offer special discounts and giveaways throughout the day. For information and event details, please contact Mesa 22.
- Police Update – the Prescription/Drug Drop-Off Box as well as the drop-off box for needle and syringe disposal, both located in the lobby of the Village Hall, continue to be a welcome addition to the Village. Individuals continue to take advantage of using the drop-off boxes to dispose of prescription or other drugs, as well as needles and syringes anonymously.
- Olde Home Days, 2026 (June 5-7) – the Marcellus Rotary Club and the OHD Committee have begun planning the 2026 OHD event to be held the weekend of June 5-7. Information will be made available in the coming weeks regarding tentative events, committee chair contacts, vendor and non-profit participation, sponsorship, and other areas. The Marcellus Olde Home Days Facebook page will be updated as planning continues through the spring. At this time, questions and information requests can be directed to Charnley Abbott, OHD Chair at charnleyabbott@gmail.com.
- Reminder to residents: No parking on Village streets from 2:00am to 7:00am until April 1st. Overnight parking is available in two municipal lots – one behind the Village Hall on Slocombe and another off West Main Street just west of the Catholic Church.
- Residents are respectfully requested to voluntarily refrain from parking on Village streets during snowfall events to allow for safe and efficient plowing. Residents are also reminded not to park across sidewalks and, when possible, to leave a two-foot buffer from sidewalks to help the sidewalk bobcat plow maneuver and clear snow effectively. Residents' cooperation is sincerely appreciated and helps maintain safe, well-cleared streets and sidewalks for all.
- Christmas Tree Pickup started January 2nd and will continue through the end of January. Christmas Trees may also be dropped off behind the Village Hall.
- The Annual Flow Report has been submitted to the DEC. The WPCP had an average flow capacity of 62% for 2025. Zero SPDES violations for 2025 as well.
- WPCP Generator was semi-annually serviced.
